EDUCATION

Georgia Institute of Technology

Atlanta, GA

Bachelor of Science in Computer Science

May 2026

- **GPA:** 3.64/4.0
- **Courses:** Algorithms, Artificial Intelligence, Machine Learning, Data Structures & Algorithms, Object Oriented Programming, Database Systems, User Interface Design, Computer Architecture
- **Organizations:** Startup Exchange, AI@GT, Trading Club, South Indian Association

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, JavaScript, HTML/CSS

Frameworks & Technologies: React, Next.js, Flask, NumPy, Pandas, TensorFlow, Scikit-learn, Bootstrap

Cloud & Distributed Systems: AWS (Lambda, Glue, Athena, Redshift, DynamoDB, S3, CDK), Modal

Databases: SQLite, MongoDB, DynamoDB, Redshift, BigQuery, Snowflake, MySQL, PostgreSQL

Developer Tools: Git, GitHub, Jenkins, VS Code, Cursor, Claude Code, Bolt, Windsurf, Cline, Xcode, Sublime Text

EXPERIENCE

Founding Engineer

Apr. 2026 – Jun. 2026

ChannelFlex - backed by Fractal Software

New York City, NY

- Built AI-powered quoting and procurement workflows for building material distributors, partnering directly with production customers to translate operational workflows into deployed software.
- Owned customer integrations, backend services, and AI-driven quoting pipelines, rapidly shipping features and iterating on production deployments based on customer feedback.
- Developed AI evaluation frameworks and automated testing suites, improving model accuracy through prompt engineering, fine-tuning, and systematic benchmarking of production AI systems.

Software Development Engineering Intern

May 2025 – Aug. 2025

Amazon Web Services (AWS)

Seattle, WA

- Built a global monitoring dashboard for 1B+ AWS Lambda invocations/month, detecting recursive loops and preventing runaway workloads that saved customers \$100K+.
- Engineered ETL pipelines with Lambda, Glue, and Athena to process terabytes of Redshift data daily and deliver real-time usage insights in QuickSight dashboards.
- Automated infrastructure with AWS CDK and CI/CD pipelines, reducing deployment time by 80% and ensuring reproducibility across environments.

Software Engineering Intern

May 2024 – Aug. 2024

Travelers Insurance

Hartford, CT

- Enhanced XML Utility Tool for 200+ underwriters, streamlining data retrieval/parsing and cutting query time by 30% with S3 + DynamoDB integration.
- Built Lambda automation for DynamoDB updates, reducing manual table maintenance by 80% and processing 1K+ records/day.
- Built Databricks ETL pipelines to ingest and transform 100K+ XML messages/week into S3 for scalable analytics.

PROJECTS

Slait | Python, FastAPI, React, TypeScript, PostgreSQL, Redis, Docker, AWS, OpenAI APIs

Jan. 2026 – Present

- Built an AI platform that analyzes Cursor and Claude Code conversations to evaluate engineering workflows and provide personalized feedback for improving AI-assisted software development.
- Developed evaluation pipelines using LLMs, embeddings, logistic regression models, and custom scoring frameworks to benchmark agent performance, identify failure modes, and generate actionable recommendations.
- Scaled the platform to 100+ active users and secured the first enterprise customer by iterating directly with engineering teams and integrating into their development workflows.

Sailo | Python, Modal, AWS, Redshift, Snowflake, BigQuery, Postgres, MySQL, LLM APIs, Next.js

Aug. 2025

- Built an AI-powered ETL agent that connects to major data warehouses, auto-generates pipelines, and deploys on Modal for real-time, zero-touch insights.
- Designed a Zapier-like drag-and-drop UI in Next.js and received traction from Lux Capital, Ramp, Modal, and AWS.

LEADERSHIP

Director of Genesis

May 2024 – May 2026

Startup Exchange GT

Atlanta, GA

- Designed and led a program teaching student builders ideation, rapid prototyping, and shipping with AI tools, encouraging public building on X (Twitter).
- Mentored 100+ students who took ideas from 0→1 in a 5-week program and connected founders with VCs for mentorship and fundraising.

Teaching Assistant, Ethics in Computing

Aug. 2025 – May 2026

Georgia Institute of Technology

Atlanta, GA

- Assisted in teaching a 200+ student course on ethics, professionalism, and computing's societal impact.
- Led weekly discussions, graded assignments, and mentored students on topics including professional ethics, privacy, and intellectual property.
